

TRAINING AND TRAVELING

INTRODUCTION

When we think of learning, we envisage a sitting in a classroom, being spoon fed information by a teacher on a normal lecture. In our complex modern world, this approach doesn't represent the best way of teaching for most corporations, seeking for case-study oriented and "learning by doing" trainings.

Therefore, experiential learning and outdoor training are at the heart of our "Training + Traveling" facilitated team workshop. We go out of the usual way to provide 3-day training on a multitude of subjects, surrounded by an astonishing landscape waiting to be discovered and treasured during the afternoon outdoor activities. Indeed, the "Training + Traveling" package enriches the experience by visiting the Dolomites and Venice, practicing outdoor sports at breath-taking sceneries, such as Mount Nevegal and Santa Croce Lake, and indulging our senses through food and wine tasting. Finally, a cosy and welcoming stay in a 4-star hotel accommodates our participants for a deserved rest at night.
